

Complete Freewheels BC

with lever arm

with rollers or with sprag lift-off X

RINGSPANN®

Application as

▶ Backstop

Features

Complete Freewheels BC with lever arm are sealed freewheels with ball bearings.

Freewheels BC are supplied oil-filled and ready for installation, on customer request with biodegradable oil. They are arranged on through shafts or shaft ends.

Besides the standard type, the type with sprag lift-off X is available for wear-free freewheeling operation at high speed rotating inner ring.

Nominal torques up to 57 500 Nm.

Bores up to 150 mm. A multitude of standardized bore diameters are available with short delivery times.

Application example

Complete Freewheel BC 90 R as a backstop on the end of a transport roller. The backdriving torque is supported by the lever arm with holding pin on the base. If the holding pin is removed, the shaft can be turned in both directions.

The maximum transmissible torque is 2 times the specified nominal torque. See page 14 for determination of selection torque.

Keyway according to DIN 6885, page 1 • Tolerance of keyway width JS10.

Mounting

The backdriving torque is supported by the lever arm with holding pin. The holding pin engages in a slot or bore in the frame of the machine. It must have 0.5 to 2 mm play in the axial and radial directions. If the holding pin is removed, the shaft can be turned in both directions.

The tolerance of the shaft must be ISO h6 or j6.
The freewheels BC are supplied oil-filled and ready for installation.

Example for ordering

Freewheel size BC 30, standard type and 50 mm bore:

- BC 30 R, d = 50 mm

When ordering, please also specify the free-wheeling direction of the inner ring when viewed in direction X:

- counter-clockwise free or
- clockwise free
